Firmware Release Notes v2.04 – Feb 1st 2019

To update to v2.04 from v1.18 or earlier you will firstly need to update your dnt file by following the instructions below

- Login and download the PDDanteV2.01 inc 4-0-9fw.dnt (5Mb) file
- If you already have 4-0-9 firmware on the Brooklyn II card within the PD Dante you will need to download and install the PDDanteV2.01.dnt (344k) file
- You will then need to update the Brooklyn II card using the Audinate Firmware Updater program

After this is completed or if upgrading from v2.01 or earlier then follow the instructions below

- Download and install the file “FPGAcontrol_V210.hexout” using the NixerBLM program as per the instructions in the User manual
- Once this has been completed follow the normal PD Dante update instructions as per the User manual to install v2.04 firmware
